

PREMIUM STACKING DOORS

PREMIUM STACKING DOORS

The great outdoors was never more affordable!

Incorporating all of the strength, quality, design and security features Jason Windows is renowned for, the Premium Stacking Door provides the ultimate alfresco solution at a very affordable price.

LEVER LOCK SECURITY

A unique lever action provides effortless operation when opening or closing the stacking door. The lever lock handle has a soft rubber infill at the back grab area, further enhancing its ergonomic feel.

The one touch single snib operation incorporates a visual indicator for when the door is locked or unlocked. A sleek integrated cylinder cover on both the outside and inside handle provides protection against the weather and cylinder corrosion, allowing operation even in harsh environments.

Tested to security industry standards with exceptional performance, the locking system provides increased locking strength and an added level of security.

STRENGTH

The sturdy design of the Premium Stacking Door offers a frame width of 195mm with profiles matching the strong look and feel of the full Premium range of products.

PERFORMANCE

Products are designed to meet the performance criteria stipulated in AS 2047 and tested by NATA approved agencies. As a member of the Australian Window Association, Jason's products are subject to third party audits designed to ensure products match the publicised test results.

Performance labels are permanently placed on all doors to confirm the structural rating and water resistance capabilities of the product.

SLIDING SCREEN DOOR SYSTEM

The Premium Stacking Door incorporates an external sliding flydoor system. Sleek and unobtrusive, the screen doors can be slid away to provide the largest possible opening for alfresco entertaining. Alternatively, the door panels can be in the fully open position with the external screen doors closed, enabling natural ventilation while keeping flies and bugs outside. Mohair to the head track ensures the doors slide smoothly without the rattling.

RANGE

The Premium Stacking Door is available in a wide range of sizes, configurations and colours. Choose from three and six panel stacking doors spanning up to six metres in width, all available in Jason's extensive range of standard and special colours.

LOW PROFILE SILL

The gentle sloping threshold on the custom sill section creates a natural ramping effect, enabling easy access. From an internal height of 54mm to just 42mm externally, the low profile sill is the perfect way to bring the outside in.

BUILDING IN DETAIL

The Premium Stacking Door can be either bricked in or site fixed into a prepared opening, providing full flexibility in the construction process. Twist in lugs to the internal and external brick course provide added strength and enduring frame fixing.

TEN YEAR WARRANTY
