

PIVOT DOORS

Pivot Doors Range

Jason Windows products have been widely used in WA homes for over 50 years and the company continues to be the market leader in product design, strength, security and customer service. We understand that a new home or home renovation is a major investment and we are committed to providing the highest quality solutions for West Australians at an affordable price.

QUALITY

Jason Windows has built its reputation on perfecting and crafting quality windows, doors and security screens specifically designed for the Western Australian market. Our attention to detail, in-house testing facility and internal processes ensure we produce quality products and services that continue to perform and stand the test of time.

SERVICE

Quality service goes hand in hand with a quality product and we are committed to providing helpful, informative and attentive customer service. From the time of your new home hand-over or completed renovation, Jason Windows will handle all warranty maintenance enquires directly with you and continue to manage all maintenance and servicing needs outside of the warranty, for the life of your home.

THE RANGE

Jason Pivot Doors are an excellent option for wider, single door openings. The frame size allows for a larger piece of glass to be installed, letting more light into your home and enhancing visibility.

There are a variety of options when it comes to Jason Pivot Doors. Since the overhead door closer is concealed, you have the option of the door opening in or opening out.

The range includes:

- Single Lite Panel
- Single Lite Panel with Sidelite
- Single Lite Panel with Hi-lite

Handles

Your Jason Pivot Door will be fitted with the Trilock Omni Allure 450mm handle as standard.

Featuring a cleverly concealed lever on the exterior side of the door and a stylish handle for the interior, it incorporates Gainsborough's 3-in-1 Trilock technology for quality and versatility. Can be keyed alike to other Jason doors in your home.

Speak to your Jason Windows product specialist or visit the Pivot Doors page, jasonwindows.com.au/pivot-doors, on our website for more handle options.

Colours

Jason Pivot Doors are available in seven popular colours from our standard colour range. Custom colours are available however extended lead times and additional charges apply.

It is always recommended to choose your colour from an actual sample as variations can occur between digital monitors and printers.

Glazing Options

Toughened safety glass is supplied as standard. Other upgrade options include:

| UPGRADED GLASS OPTIONS | APPLICATION |
|--------------------------|--|
| Laminated (Safety Glass) | <ul style="list-style-type: none"> • Areas requiring special performance such as sound reduction, energy efficiency and additional security • Areas most prone to injury from human impact such as bathrooms, splashbacks, doors and full-length windows |
| Toned (Tinted Glass) | <ul style="list-style-type: none"> • Useful for reducing the sun's impact on unshaded doors |
| Low-E | <ul style="list-style-type: none"> • Areas where greater solar and thermal control is required. Helpful in reducing new homes Energy Efficiency Rating and a cost-effective alternative to double glazing. |

Australian Standards & Building Regulations will determine some glass choices within your home. All new homes or new renovations need to comply with these regulations.

For example, as a general guide, you must use Grade A Safety Glass in:

- All glass doors
- Bathrooms (for all areas up to 2m high)
- Door side panels (if less than 300mm away from the door and positioned 1200mm or less above the floor)
- Areas that can be mistaken for openings such as full height glass
- Low level glass if larger than 1.2m. Areas under 1.2m require a minimum glass thickness of 5mm.

ANOTEC DARK GREY

GLASS APPEARANCE

Best suited for clarity and low distortion. Use in areas you want to flood with natural light or enjoy a clear view. For north facing elevations, use to heat up north facing rooms in the winter.

OBSCURE GLASS

With a smooth milky finish, translucent glass provides a high level of privacy and is often chosen for front entry doors. Can also be paired with a toned glass.

Neutral glass is lightly toned and only available in Low E. The light tone is often preferred for a softer natural light effect.

Commonly selected to achieve a darker elevation and to reduce the amount of light coming into the home. Offers good reduction levels of UV light. Pairing a toned glass with the insulation properties of Low E glass will provide greater energy efficiency than Low E alone.

Offering a small reduction in light and UV light, the green toned glass can provide a softer natural light effect. Pairing a toned glass with the insulation properties of Low E glass will provide greater energy efficiency than Low E alone.

Ask our product specialists for guidance in choosing the best glass type/s for your home.
